

Insertion & Removal of a Curved Tipped Urethral Catheter

(Click on the title to access the video)

In 4:30 minute video you will learn:

- The clinical rationale for why a curved tipped (coude) catheter is needed.
- The differences between a straight tipped and a curved tipped catheter.
- How to insert and remove the catheter.

Please note, the video may take 1-2 minutes to download.

The video has been developed by the British Columbia Provincial Nursing Continence Committee and is posted on CLWK for your personal development; you can review it as often as you wish.

The CLWK site does not provide certificates of completion; if you need to have a record that you have watched this video, please access the video through the British Columbia LearningHub site or the Yukon Learning Management System site.
