

Pressure Injury Prevention (Braden Risk Scale & Interventions)

(Click on the title to access the module)

The key learning points of this 30-minute module are:

- What patient/client/resident risk factors are associated with the development of a pressure injury.
- How to perform a Braden Risk Assessment and document its score.
- How Braden sub-scales are used to focus interventions to mitigate the pressure injury risk.

The module has been developed by the British Columbia Provincial Interprofessional Skin & Wound Committee and is posted on CLWK for your personal development; you can review it as often as you wish.

The CLWK site does not provide certificates of completion; if you need to have a record that you have completed this module, please access the module through your health authority/agency's Learning Management System site.

Please note: pressure ulcer = pressure injury
