

British Columbia NSWOC/Wound Clinician Education Sessions

Session 1: Semiology of Cutaneous Lesions

(Click on the title to access the recording)

A ~90 minute Teams recording of the NSWOC/Wound Clinician Dermatology Education Session 1 which was presented live on March 2nd and repeated on March 9th.

Please note:

- As this is a Health Authority Teams recording, you will be asked to sign in using your HA email address. (For those HAs not yet on Teams, you can still access the recording with your email address).
- There were technical issues at the start of the session, please advance the recording by moving the white dot along the recording timeline  to ~9.25 minutes into the session to get to the introduction of Dr. Layla Nabai, the presenter.

Semiology is the over-arching term for the assessment of symptoms, signs (both body and lab), history taking and physical examination.
