Skin IQ Microclimate Manager		
Classification	Moisture Transfer – Skin	
Key Points	 Disposable single-use 6mm (1/4") thick, water-resistant vapor-permeable mattress cover which can be placed over top of a standard mattress or a pressure redistribution mattress Designed to draw excess moisture away from the skin and helps maintain normal skin temperature Has antimicrobial properties which helps with the control of bacteria and odor Helps reduce shear and friction. Cover is available for standard and bariatric mattresses 	
Indications	 Client who has or who is at risk for developing moisture-related skin damage or a pressure ulcer and who cannot tolerate a low air loss mattress or the low air loss mattress is not indicated (entrapment concerns) Client with a Braden Moisture sub-scale score 3 or less and /or Braden Friction and Shear sub scale score 2 or less Client who is febrile and has an increased risk of developing pressure ulcers or moisture related skin damage and who cannot tolerate a low air loss mattress or the low air loss mattress is not indicated (entrapment concerns) Client with a heavily draining wound that requires multiple dressing changes and would benefit from a moisture managed micro-climate surface and who cannot tolerate a low air loss mattress or the low air loss mattress is not indicated (entrapment concerns) Client with a loss mattress is not indicated (entrapment concerns) The Skin IQ cover is designed for clients whose weight is less than 200kg (500lbs) The Skin IQ 1000 cover is designed for clients whose weight is between 200-400kg (500-1000bs) and designed to fit a bariatric mattress Client's condition should require a Skin IQ surface for 5 days or greater 	
Precautions	 Client should have an indwelling urinary catheter or condom catheter(male) insitu if moisture associated skin damage is due to urinary incontinence Client should have an indwelling fecal containment device, if moisture associated skin damage is due to fecal incontinence If an underpad is needed, only an air-permeable underpad is to be used Skin IQ surface does not provide pressure redistribution 	
Contraindications	The client needing a brief or pull-up for incontinence as these will interfere with the effectiveness of the Skin IQ in the perineal area. Package come with mattress cover	
Formats & Sizes	 Package come with mattress cover, power unit(fan) and power cord: Skin IQ cover (weight up to 200kg) is available in two mattress lengths: 207.1cmx 91.5cm x 17.8cm (80''x 36'' x 7'') Skin IQ 1000 cover (weight bt 200-400kg) is available in two mattress lengths: 207.1cm x 121.9cm x 17.8cm (80''x 48''x 7'') 213.0cm x 121.9cm x 17.8cm (84''x 48 x 7'') Can purchase cover and power unit/cord separately if needed
